Present Position: June 1, 2004 Professor of Haemostaseology at the Clinical Division of Haematology and Haemostaseology, Department of Medicine I, Medical University of Vienna.

Clinical and Scientific Education

Haemostaseology and Vascular Biology

- Diagnostic procedures and treatment of patients with haemorrhagic diathesis and thrombotic events or thrombophilia (Outpatient department and ward)
- Routine laboratory haemostaseologic and haematologic diagnostic procedures, including validation of laboratory results, morphology of haematologic diseases and immunophenotyping of haematopoietic cells.
- Set-up and supervision of scientific laboratory procedures- including functional and immunologic methods.

Period abroad for scientific purposes

1982 and 1985 stay in the laboratory of Prof.Dr.R.M. Bertina in Leiden, the Netherlands, for periods of several weeks.

Clinical Functions since Specialisation in Internal Medicine

- Haemostaseology outpatient department (diagnosis and treatment of hereditary and acquired bleeding disorders, diagnosis and treatment of patients with thromboembolic disorders), 14 years as director, ongoing.
- Director of the Haemophilia Center Vienna since 1998
- Director of the haematology ward (one year) and the general internal ward at the Medical Clinic I (5 months)
- Institute of Medical and Laboratory Diagnostics, Haematology Laboratory (5 months)
- Outpatient department for patients with haematologic and haemato-oncologic diseases (6 months)

Teaching activities

During my training in Internal Medicine and specialisation in Haematology and Oncology regular lectures and training courses under supervision, since 1992 regular, autonomous education and examination of students.

Mentoring of 8 doctoral theses; mentoring of 2 associate professors (Doz. Dr. Claudia Rintelen and PD Dr. Cihan Ay) for the achievement of their professorial dissertations (2003, 2011); mentoring of diploma students.

Regular teaching in the Curriculae N201, N202 (human medicine), N094 (PhD) and N790 (Doctoral Program of Applied Medical Science).

Scientific activity

Since I started my career at the Department of Internal Medicine I in 1982, I have continuously been engaged in scientific working. Since 1990 I have been in charge of a scientific laboratory with focus on thrombosis research and bleeding disorders.

Specific fields of interest have been:

- Hereditary and acquired thrombosis risk factors: molecular and biochemical basis, aspects of diagnosis, clinical features and therapy
- Aspects of haemophilia treatment and acquired hemorrhagic diathesis
- Fundamentals and clinical relevance of coagulation abnormalities in patients with oncologic and haemato-oncologic diseases.
- Clinical and immunologic characteristics of patients with immune-thrombocytopenia
- Specific haemostaseologic problems in critically-ill patients

Experience in clinical studies

Principal Investigator in >50 clinical trials, Coordinating Investigator in four international studies.

Last **GCP training** on 20 April 2016, performed by S2 ScienceSolutions.

Publications

Publication of 370 papers in peer-reviewed journals, mainly in the fields of thrombosis and haemostasis, haematology and internal medicine.
